

JUDY HENRY

CYBERCRIMINOLOGY B.S.

Tallahassee, FL. | JPH22D@fsu.edu | LinkedIn.com/in/judyhenry

Cyber Criminology student focused on full-stack development with an emphasis on security. I build web and mobile applications while applying secure development practices and user-focused design.

AREA OF EXPERTISE

HTML CSS Javascript Web Design	Computer and Network Admin Data Structures & Algorithms	C++ Java Assembly Computer Security
---------------------------------------	--	--

KEY ACHIEVEMENTS

- **Social Chair for the ACM Chapter (2023 - 2025)**
 - Spearheaded the growth of membership 300%, significantly increasing event, competition, and workshop turnout.
 - Organized FSU semi - annual coding competitions
 - Currently hosting a workshop aimed at helping freshmen navigate career paths in computer science.

PROFESSIONAL EXPERIENCE

- Lab Assistant - Florida State University, Computer Science Lab** **Aug 2024 - Present**
- Provide technical support in a Computer Science lab
 - Assisting users with system access, troubleshooting, and general technical issues in a multi-environment setup (Windows/Linux)
 - Support the operation and maintenance of lab equipment
 - Direct users to appropriate resources or staff for additional support

PROJECTS

- JAYETECH.DEV - Live** **Aug 2024 - Present**
- My first full portfolio project built with HTML, CSS, and JavaScript. I designed and illustrated the visual assets myself, which made the process especially fun since it allowed me to combine art and development in one project.

EDUCATION

- Cyber Criminology B.S.** **Aug 2022 - May 2026**
- Florida State University | Spring 26' | 3.2 GPA
- | | |
|---|----------------------------------|
| • Data Structures and Algorithms I & II | • White Collar Crime |
| • Computer and Network Administration | • Computer Security Fundamentals |
| • Computer Organization I (assembly prog) | • Law Enforcement |

ADDITIONAL INFORMATION

- **Languages:** English, Conversational Spanish
- **Student Dashboard Web App (In Progress)**
 - creating RESTful APIs, handling user data, and designing an interactive frontend interface, using .NET and C#.
 - Currently focusing on API development, data flow, and integrating frontend components with backend services.
